# ABOUT NON-GAAP FINANCIAL MEASURES

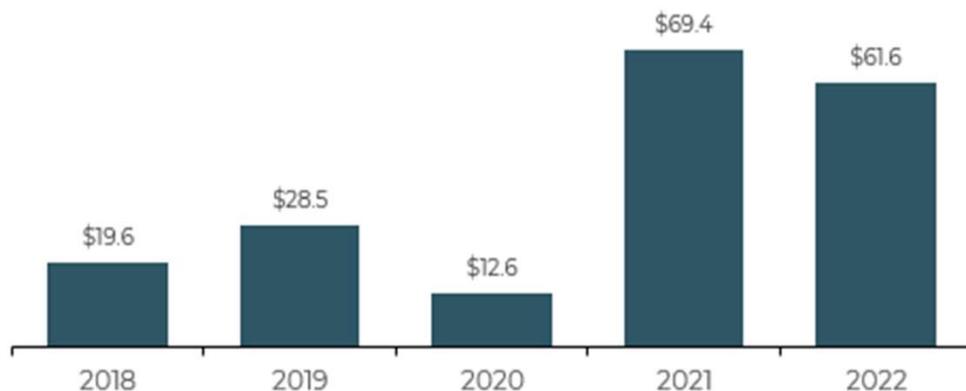

In addition to disclosing financial measures determined in accordance with U.S. generally accepted accounting principles (GAAP), we disclose non-GAAP financial measures, including “adjusted net income”, “adjusted diluted earnings per share”, “pre-tax pre-provision profit”, “tangible common stockholders’ equity”, “tangible book value per share”, “adjusted return on average assets (ROAA)”, “adjusted return on common equity (ROE)” and “adjusted efficiency ratio – fully tax equivalent (FTE).”

We consider the use of select non-GAAP financial measures and ratios to be useful for financial and operational decision making and useful in evaluating period-to-period comparisons. We believe that these non-GAAP financial measures provide meaningful supplemental information regarding our performance by excluding certain expenditures or gains that we believe are not indicative of our primary business operating results. We believe that management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning, forecasting, analyzing and comparing past, present and future periods.

These non-GAAP financial measures should not be considered a substitute for financial information presented in accordance with GAAP and should not be relied on alone as measures of our performance. The non-GAAP financial measures we present may differ from non-GAAP financial measures used by our peers or other companies. We compensate for these limitations by providing the equivalent GAAP measures whenever we present the non-GAAP financial measures and by including a reconciliation of the impact of the components adjusted for in the non-GAAP financial measure so that both measures and the individual components may be considered when analyzing our performance. A reconciliation of non-GAAP financial measures to the comparable GAAP financial measures is provided at the end of this presentation.
